Women’s Health and Cancer Rights Act of 1998 Notice

Group health plans are now required to cover the following procedures:

- Reconstruction of the breast on which the mastectomy was performed;
- Reconstructive surgery of the other breast to present a symmetrical appearance; and
- Prostheses and coverage for physical complications at all stages of the mastectomy procedure, including lymphedas.

This change only affects the procedures in connection with mastectomy treatments. All College plans meet this requirement.

If you have questions about the Women's Health and Cancer Rights Act, call the Benefits Office.
